DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114.

Applicant's submission filed on 6/1/2004 has been entered.

Response to Arguments

2. Applicant's arguments, see Remarks (pages 2 and 3), filed 6/1/2004, with respect to claims 1-20 have been fully considered and are persuasive. The rejection of claims 10-20 has been withdrawn.

EXAMINER'S AMENDMENT

3. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Mr. Richard McGrath (Reg. # 29,195) on 5/23/2005.

The application has been amended as follows:

In the specification:

On page 9, after line 23, insert: --Fig. 44 is a flow diagram illustrating the VOP random access processing. --

Art Unit: 2624

4. Claims 1-132 are allowed.

5. The following is an examiner's statement of reasons for allowance:

The present invention provides a new encoding and decoding apparatus, method, and recording medium capable of enabling, when all the images contained in a moving picture sequence undergo only the intra coding, to carry out access to the very image at a desired time, so as to facilitate smooth decoding processing like the frame skip control, thereby shortening the decoding processing (specification, page 4, lines 9-17).

Particularly, the new apparatus, method, and recording medium comprise the following features, which the prior art taken either singly or in combination does not teach:

- an analyzer for... is intra coded (see independent claims 1 and 10);
- a multiplexer for... is intra coded (see independent claims 17 and 19);
- a header multiplexer... instruction signal (see independent claim 21);
- multiplexing header information... the intra-coded instruction signal (see independent claim 31);
- an intra-code indicator... each individual VOP is intra-coded (see independent claim 41);
- a header analyzer... each individual VOP is intra-coded (see independent claims 49 and 69);
- wherein the image decoding apparatus... the VOL are intra-coded (see independent claim 131).

Art Unit: 2624

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
